Subject: RE: Malathion: FMC Commitment Letter Question

I need to do a more thorough dig through emails/files, which I will do first thing tomorrow.

Ex. 5 - Deliberative Process

Also, they had submitted request to remove cull piles and larvecide uses from labels (as of Sept 28, 2015, most labels were updated).

Avivah,

I wanted to quickly check in and see if you had an opportunity to look into the FMC commitment letter question. I'm also going to reach out to Eric to see if he might have information on this in his email.

Hi Steven,

Sure thing, I will send you what I have on this later this morning.

Subject: Malathion: FMC Commitment Letter Question

Avivah,

I hope the detail is going well! We were hoping to quickly pick your brain a bit regarding malathion. USFWS recently sent us their project description for the malathion Biological Opinion under ESA [attached]. While OPP reviewed this for comment, Anita brought up the point that if FMC previously agreed to not support certain uses (and being the sole registrant for said uses), they will need to submit a commitment letter stating such, and PRD agrees.

Do you happen to remember, or have in your emails from 2015-2016, any record of them having submitted such a letter or discussion of preparing one? This would have been just before I took over malathion. More detail is listed in the appendix 1-5 [attached and addressed to you] which includes FMC's correspondence on this.

Any information you can provide on this would be greatly appreciated. If you can't locate anything, we will just reach out to FMC. Thank you for your help!
